ContactMonkey Sending Checklist

Before you hit "Send now" and distribute your important communications, use this checklist to ensure everything is perfect.

Before you send:	
	Select your Email Design: Click "Choose from library" to import the finalized, reviewed and approved email into your email.
	Send a Test: Send a test to yourself and/or colleagues before sending to your recipient list. This gives you the chance to preview the layout without tracking engagement.
	Insert Subject Line: Is your Subject Line clear, compelling, and ready to go? A subject line is required for your email to send.
	Select Tracking Type: Make sure you've selected the appropriate tracking type for your email in the "Additional Settings" section. <u>Click here to read more about tracking</u> .
	Add your Recipients: Select how you want to add your recipients: CSV upload or List Management Contact List(s)
	Verify your "From" field: If you're sending as another user or shared mailbox, ensure your "Send from" field is correctly set.
Ready to send!	
	Click "Send now": This is the most important step!
	Or, Schedule for Later: This option allows you to set a future send date and time. Your email will send automatically, even if you've closed your dashboard.
